**MAXIMUM LOAD CAPACITY . . .  
. . . MINIMUM STORAGE SPACE**

JONNI-KART will carry a full six cubic feet of soiled linens or other bulky materials on 8" rubber tired ball bearing wheels, suspended on 1/2" plated steel axle. JONNI-KART is constructed of "Aerolite" aluminum, the same light, tough material used in present day jet aircraft. JONNI-KART was designed by the originators of materials handling equipment built of aircraft aluminum.

**SIMPLE TO KEEP SPARKLING CLEAN  
REMOVABLE DUCK SIDES**

Folding sides of #10 long wearing, vinyl coated duck, meeting military specifications, and unique method of mounting make them easily removed for cleaning or replacement.

JONNI-KART is used at the world famous Sea Breeze resort.

Ideal for use in hospitals where space and cleanliness is all important. Shown in use at Palm Beach General Hospital.

ONCE YOU HAVE USED JONNI-KART YOU'LL NEVER GO BACK TO ORDINARY "CARRY-ALLS." For hard to service areas, up and down stairs, around corners, nothing does the job like JONNI-KART. JONNI-KART spans a full 56" from handle to tip with a load opening 24" x 43", yet folds to a mere 10" for storing in a closet, behind a door, or against a wall. JONNI-KART weighs but 16½ lbs. yet will handle over ten times its own weight.

GARDEN CART

Compare JONNI-KART with ordinary types of handling equipment and you will see why

JONNI-KART is the newest, most advanced "carry-all" on the market today.

Unlike most carts, JONNI-KART being constructed entirely of "Aerolite" aircraft aluminum, will not rust. The extreme lightweight and superior strength of JONNI-KART gives you the fastest handling of soiled linens or other bulky materials and allows you to maneuver into the most difficult areas with the greatest of ease as shown by the photograph taken at the world famous SEA BREEZE RESORT at the right. Imagine trying to negotiate this curved stairway with ordinary handling equipment.
